<i>Argue, A. N. and Kenworthy, C. M.</i> , Optical positions for 21 3C objects	197
<i>Balazs, N. L.</i> , Accretion flows and their stability... ..	79
<i>Bandermann, Lothar W.</i> , Effects of erosion and fragmentation on the mass distribution of colliding particles	321
<i>Batchelor, A. S. J. and Brocklehurst, M.</i> , Radial velocities from the radio recombination lines of Orion A	27P
<i>Becklin, E. E., Wynn-Williams, C. G. and Neugebauer, G.</i> , Infra-red sources in the H II region W3	I
<i>Blackwell, D. E., Calamai, G. and Willis, R. B.</i> , Effects of uncertainties in damping and micro-turbulence on theoretical deductions from solar equivalent widths	121
<i>Blackwell, D. E., Kirby, J. H. and Smith, G.</i> , The damping of the NaD lines in the solar spectrum by atomic hydrogen	189
<i>Brocklehurst, M.</i> , Collision strengths for the 10.5μ transition of S^{3+}	19P
<i>Brocklehurst, M.</i> (see Batchelor, A. S. J.)	27P
<i>Burke, J. Anthony</i> , On mass loss by sporadic ejection	233
<i>Calamai, G.</i> (see Blackwell, D. E.)	
<i>Charman, W. N., Meikle, W. P. S., Drever, R. W. P., Haynes, R. F., Shakeshaft, J. R. and Jelley, J. V.</i> , A search for isolated radio pulses from the Crab Nebula at 151.5 MHz	5P
<i>Conway, R. G. and Stannard, D.</i> , High resolution radio observations of AP Lib	31P
<i>Critchley, J., Palmer, H. P. and Rowson, B.</i> , Observations of radio sources with an interferometer of 24-km baseline—I. The angular structures at 408 MHz of 106 sources from the Parkes catalogue	271
<i>Davies, R. D.</i> , Observations of the Outer spiral structure of the Milky Way and its relation to the high velocity clouds	381
<i>Dickens, R. J. and Rolland, A.</i> , <i>UBV</i> photometry of the metal-rich globular cluster NGC 6171	37
<i>Disney, M. J.</i> , Optical arrays	213
<i>Drever, R. W. P.</i> (see Charman, W. N.)	5P
<i>Evans, Aneurin</i> , The distribution of optical spectral indices for QSO's from <i>U, B, V</i> data	407
<i>Gabriel, A. H.</i> , Dielectronic satellite spectra for highly-charged helium-like ion lines	99
<i>Grant, I. P. and Peraiah, A.</i> , Spectral line formation in extended stellar atmospheres	239
<i>Haynes, R. F.</i> (see Charman, W. N.)	
<i>House, F. C., Innanen, K. A., Wright, A. E. and Keenan, D.</i> , The stability of certain model binary stellar systems in galactic gravitational fields	249
<i>Innanen, K. A.</i> (see House, F. C.)	
<i>Jelley, J. V.</i> (see Charman, W. N.)	
<i>Keenan, D.</i> (see House, F. C.)	
<i>Kenworthy, C. M. and Argue, A. N.</i> , Optical positions for 21 3C objects	197
<i>Kirby, J. H.</i> (see Blackwell, D. E.)	
<i>Leong, T. K. and Sen, K. K.</i> , A probabilistic model for time-dependent transfer problems in spherical shell media	21
<i>Lyttleton, R. A.</i> , A new solution to the accretion problem	255
<i>Meikle, W. P. S.</i> (see Charman, W. N.)	
<i>Moffat, P. H.</i> , Aperture synthesis polarimetry of the Moon at 21 cm	139
<i>Neugebauer, G.</i> (see Becklin, E. E.)	
<i>Okoye, S. E.</i> , The interpretation of the X-ray emission detected from some nearby radio galaxies	339
<i>Palmer, H. P.</i> (see Critchley, J. P.)	
<i>Peat, D. W., Rego, M. E. and Williams, P. M.</i> , Stellar compositions from narrow-band photometry—IV. Calcium abundances in G and K giants	129
<i>Peraiah, A. and Grant, I. P.</i> , Spectral line formation in extended stellar atmospheres	239
<i>Peters, William, L. and Warner, Brian</i> , The location and size of the hot spot in cataclysmic variable stars	15
<i>Rego, M. E.</i> (see Peat, D. W.)	
<i>Rolland, A. and Dickens, R. J.</i> , <i>UBV</i> photometry of the metal-rich globular cluster NGC 6171	37
<i>Rowson, B.</i> (see Critchley, J.)	
<i>Savedoff, Malcolm P. and Taff, L. G.</i> , The mass spectrum of interstellar clouds and the assumption of total coalescence	89
<i>Sen, K. K. and Leong, T. K.</i> , A probabilistic model for time-dependent transfer problems in spherical shell media	21
<i>Sen, K. K., Wilson, S. J. and Tung, C. T.</i> , The Eddington factor for radiative transfer in spherical geometry	349
<i>Shakeshaft, J. R.</i> (see Charman, W. N.)	
<i>Sinclair, A. T.</i> , On the origin of the commensurabilities amongst the satellites of Saturn	169
<i>Smith, G.</i> (see Blackwell, D. E.)	
<i>Stannard, D.</i> (see Conway, R. G.)	31P

SUBJECT INDEX

	PAGE
Astrometry	
Optical positions for 21 3C objects, <i>A. N. Argue and C. M. Kenworthy</i>	197
Celestial mechanics	
On the origin of the commensurabilities amongst the satellites of Saturn, <i>A. T. Sinclair</i> ...	169
Cosmology	
A hypothesis, unifying the structure and the entropy of the Universe, <i>Ya. B. Zeldovich</i> ...	1P
Galactic structure and stellar dynamics	
The stability of certain model binary stellar systems in galactic gravitational fields, <i>K. A. Innanen, A. E. Wright, F. C. House and D. Keenan</i>	249
Observations of the outer spiral structure of the Milky Way and its relation to the high velocity clouds, <i>R. D. Davies</i>	381
Galaxies	
The interpretation of the X-ray emission detected from some nearby radio galaxies, <i>S. E. Okoye</i>	339
Instruments and techniques	
Optical arrays, <i>M. J. Disney</i>	213
Improved three-lens field correctors for paraboloids, <i>C. G. Wynne</i>	13P
Interstellar medium	
The mass spectrum of interstellar clouds and the assumption of total coalescence, <i>L. G. Taff and M. P. Savedoff</i>	89
High velocity gas near the Gum nebula, <i>A. D. Thackeray and P. R. Warren</i>	23P
Nebulae—gaseous	
Infra-red sources in the H II region W3, <i>C. G. Wynn-Williams, E. E. Becklin and G. Neugebauer</i> ...	I
The structure of the Crab Nebula—II. The spatial distribution of the relativistic electrons, <i>A. S. Wilson</i>	355
The structure of the Crab Nebula—III. The radio filamentary radiation, <i>A. S. Wilson</i> ...	373
A search for isolated radio pulses from the Crab Nebula at 151.5 MHz, <i>W. P. S. Meikle, R. W. P. Drever, R. F. Haynes, J. R. Shakeshaft, W. N. Charman and J. V. Jelley</i> ...	5P
High velocity gas near the Gum nebula, <i>A. D. Thackeray and P. R. Warren</i>	23P
Radial velocities from the radio recombination lines of Orion A, <i>A. S. J. Batchelor and M. Brocklehurst</i>	27P
Physical processes	
A probabilistic model for time-dependent transfer problems in spherical shell media, <i>T. K. Leong and K. K. Sen</i>	21
Accretion flows and their stability, <i>N. L. Balazs</i>	79
On mass loss by sporadic ejection, <i>J. A. Burke</i>	233
A new solution to the accretion problem, <i>R. A. Lyttleton</i>	255
Effects of erosion and fragmentation on the mass distribution of colliding particles, <i>L. W. Bandermann</i>	321
The Eddington factor for radiative transfer in spherical geometry, <i>S. J. Wilson, C. T. Tung and K. K. Sen</i>	349
Planetary system	
Aperture synthesis polarimetry of the Moon at 21 cm, <i>P. H. Moffat</i>	139
On the origin of the commensurabilities amongst the satellites of Saturn, <i>A. T. Sinclair</i> ...	169
A new solution to the accretion problem, <i>R. A. Lyttleton</i>	255
Quasars	
The distribution of optical spectral indices for QSO's from <i>U, B, V</i> data, <i>A. Evans</i>	407
Radio astronomy	
Aperture synthesis polarimetry of the Moon at 21 cm, <i>P. H. Moffat</i>	139
Optical positions for 21 3C objects, <i>A. N. Argue and C. M. Kenworthy</i>	197
Observations of radio sources with an interferometer of 24-km baseline—I. The angular structures at 408 MHz of 106 sources from the Parkes catalogue, <i>J. Critchley, H. P. Palmer and B. Rowson</i>	271
Observations of radio sources with an interferometer of 24-km baseline—II. The angular structures at 151 and 408 MHz of 46 unidentified radio sources from the revised 3C catalogue, <i>P. K. Wraith</i>	283

	PAGE
Observations of radio sources with an interferometer of 24-km baseline—III. The angular structures at 408 and 1423 MHz of 44 relatively intense radio sources, <i>P. N. Wilkinson</i> ...	305
The interpretation of the X-ray emission detected from some nearby radio galaxies, <i>S. E. Okoye</i> ...	339
The structure of the Crab Nebula—II. The spatial distribution of the relativistic electrons, <i>A. S. Wilson</i> ...	355
The structure of the Crab Nebula—III. The radio filamentary radiation, <i>A. S. Wilson</i> ...	373
Observations of the outer spiral structure of the Milky Way and its relation to the high velocity clouds, <i>R. D. Davies</i> ...	381
A search for isolated radio pulses from the Crab Nebula at 151.5 MHz, <i>W. P. S. Meikle, R. W. P. Drever, R. F. Haynes, J. R. Shakeshaft, W. N. Charman and J. V. Jelley</i> ...	5P
Radial velocities from the radio recombination lines of Orion A, <i>A. S. J. Batchelor and M. Brocklehurst</i> ...	27P
High resolution radio observations of AP Lib, <i>R. G. Conway and D. Stannard</i> ...	31P
Spectroscopy	
Dielectronic satellite spectra for highly-charged helium-like ion lines, <i>A. H. Gabriel</i> ...	99
The damping of the NaD lines in the solar spectrum by atomic hydrogen, <i>D. E. Blackwell, J. H. Kirby and G. Smith</i> ...	189
Spectral line formation in extended stellar atmospheres, <i>I. P. Grant and A. Peraiah</i> ...	239
Collision strengths for the $10^5 \mu$ transition of S^{3+} , <i>M. Brocklehurst</i> ...	19P
Stars	
On the radii of white dwarf stars, <i>B. Warner</i> ...	435
Stars—binary	
Contact binaries: opacity and rotation, <i>J. A. J. Whelan</i> ...	63
The stability of certain model binary stellar systems in galactic gravitational fields, <i>K. A. Inmanen, A. E. Wright, F. C. House and D. Keenan</i> ...	249
<i>B</i> and <i>V</i> photometry of Cygnus X-1, <i>E. N. Walker</i> ...	9P
Stars—chemical composition	
Effects of uncertainties in damping and microturbulence on theoretical deductions from solar equivalent widths, <i>D. E. Blackwell, G. Calamai and R. B. Willis</i> ...	121
Stellar compositions from narrow-band photometry—IV. Calcium abundances in G and K giants, <i>M. E. Rego, P. M. Williams and D. W. Peat</i> ...	129
Stars—clusters	
<i>UBV</i> photometry of the metal-rich globular cluster NGC 6171, <i>R. J. Dickens and A. Rolland</i> ...	37
Stars—photometry	
<i>UBV</i> photometry of the metal-rich globular cluster NGC 6171, <i>R. J. Dickens and A. Rolland</i> ...	37
Stellar compositions from narrow-band photometry—IV. Calcium abundances in G and K giants, <i>M. E. Rego, P. M. Williams and D. W. Peat</i> ...	129
Four-colour and $H\beta$ photometry of some bright southern stars—II. <i>N. R. Stokes</i> ...	155
Photometric systems for quantitative studies of white dwarfs, <i>D. T. Wickramasinghe and P. A. Strittmatter</i> ...	421
<i>B</i> and <i>V</i> photometry of Cygnus X-1, <i>E. N. Walker</i> ...	9P
Stars—variable	
The location and size of the hot spot in cataclysmic variable stars, <i>B. Warner and W. L. Peters</i> ...	15
On mass loss by sporadic ejection, <i>J. A. Burke</i> ...	233
Sun	
Effects of uncertainties in damping and microturbulence on theoretical deductions from solar equivalent widths, <i>D. E. Blackwell, G. Calamai and R. B. Willis</i> ...	121
The damping of the NaD lines in the solar spectrum by atomic hydrogen, <i>D. E. Blackwell, J. H. Kirby and G. Smith</i> ...	189
